Course Evaluation Results

Zerin Dong,

In the attachment you will find the results of the course evaluation for ECON 110 21L Econometrics.

You will find the overall results in the first section, "Overall indicators", followed by the responses to individual closed answer questions.

In the Profile section, you will be able to see comparison of ECON 110 21L Econometrics to all courses.

At the end of the report, you will find the open answer question responses.

Please feel free to reach out to your school's instructional support team for any questions.

Best,
UC Merced Instructional Support Staff

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- The Lab was very effective in learning the material that we skipped in class. I loved the overall layout!
- Very helpful explanations. Was available to meet outside of posted hours.
- Zerin is an amazing TA. He cares for his students a lot. He has the skills and knowledge to help students in the lab and during office hours. What I like the most about this course is the time I spent with him during office hours. He helped me to understand the homework. He had patience in explaining the concept many times. He was also available for consultation outside his student office hours.
- Zerin was very helpful when you had questions or concerns about the course and the material learned in the course. During labs he answered all questions clearly and made sure our lab understood what was being taught during lecture.

3.2) What could the instructor do to improve the course, if anything?

- N/A (2 Counts)
- nothing, everything was great!

3.3) Other comments or suggestions.

- He loves econometrics and loves helping out the students. He wants all the students to be successful in the class. Zerin would not just talk about school but would talk about his journey and the work that he has done. Very inspiring.
- Thank you! You were really helpful!

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- As it pertains to the lab section specifically, I like learning STATA the most and the review going over sample midterms was very helpful. I believed the instructor was very clear and explained everything well.
- Discussion sections helped me get a better understanding of most of the material. Going through the work and seeing it worked out for us allowed me to translate that onto our exams. Also very helpful in office hours and available to meet outside of those times.
- I enjoyed using Stata.
- OMG if it wasn't for Zerin I couldn't confidently say I would've passed the class. He is a great person and explains things so perfectly I wish I could replace him for the professor. I always knew if I had any troubles or questions TA Zerin can come in and save the day. Truly the BEST TA I've ever had and this is my third year at UC Merced.
- The instructor was enthusiastic about the subject. He was very nice to us students and answered questions even after labs. It was very helpful that he replied to emails very quickly. His teaching was very effective and easy to understand as well.
- What I loved the most about the instructor for Econometrics was that he was always very patient. I had a hard time understanding several concepts. Zerin Dong would always try his best to explain the concepts in different forms to help ensure that I understood.
- Zerin knew his stuff and knew how to teach it but often went very fast and some of the steps he would teach during lab would not be the same as what the professor taught during lecture. Therefore, causing confusion.

3.2) What could the instructor do to improve the course, if anything?

- Everything was great.
- N/A
- NOPE
- Teach slower and give clearer steps and instructions for lab assignments.
- When working with STATA, especially near the beginning of the semester it would have been useful to have the worksheets include the introductory commands that are useful especially for those who haven't used STATA before. I mentioned this in the course evaluation as well but the worksheets that had both individual and group work I believe would have been better as just focusing on group work, as there was not much group time given for the project.

3.3) Other comments or suggestions.

- N/A (2 Counts)
- Thank you for your patience throughout this semester! You made a statistics class, which I was dreading, bearable and interesting!

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- Efficient
- How well organized everything as was and detailed the notes were for this class.
- I liked his professionalism, his explanations were also extremely clear and helpful.
- The instructor was always happy to answer any question, whether in discussion, in class, and even outside of class. They were great when it came to introducing new material as well as reviewing material. They were always respectful and hardworking.

3.2) What could the instructor do to improve the course, if anything?

- Better technological presentation
- the discussions felt extremely compact, and it often felt like we did not have time to ask questions bc of that.

3.3) Other comments or suggestions.

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- explanations of the class content are good and easy to understand
- he really wanted us to succeed
- He went at a good pace.
- I was able to learn about how math can be applied to econ and I learned about myself even more. The instructor is nice and is able to help me out during his office hours
- N/A
- The notes and TA were helpful.

3.2) What could the instructor do to improve the course, if anything?

- I would definitely say have curves. Shifts are helpful but shifts would definitely help out more. Have office hours for econ 100 and 10 separate
- N/A (2 Counts)
- Needs better handwriting.
- nothing
- not much really, fairly fun and engaging class

3.3) Other comments or suggestions.

- N/A (2 Counts)
- no
- potato :}
- Thank you for the help, and for accommodating my needs with everything about my family matters.
- Thank you for this semester and hopefully I'll have you in my future course

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- Both TAs for this course were amazing
- Explanations and instruction were directly connected to the assignments we had in class. Zerin was very helpful in answering questions during office hours and email as well.
- I liked how understanding and attentive our TA was, they were very welcoming and provided us any help we needed.
- I liked the lab discussions for this course. This is the only time I felt like I could actually understand the material and what I was supposed to do
- I loved learning about the simple linear regression model and how we can come up with different economics topics and find different independent variables and see how they affect the dependent variable.
- NA
- none
- The way the material was presented made it easy to understand and was very detailed. The notes were easy to follow as well.
- You were great and a really big help. I truly appreciate how available and how helpful you were to us the students.

3.2) What could the instructor do to improve the course, if anything?

- N/A (3 Counts)
- NA
- none
- Nothing, Mr. Dong was so helpful and really cares about his students and was great help to me when i had a question on homework or regarding an exam.
- The wording that was used for the home works and sample midterms vs the actual midterms did not match up whatsoever. It made taking the exams extremely frustrating and although I could easily get through the sample midterms it was impossible to understand what I was supposed to be figuring out on the midterm.

3.3) Other comments or suggestions.

- Keep doing what you're doing!!
- N/A (2 Counts)
- NA
- none

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- As always, Zerin did an amazing job at explaining the course material to my peers and I. His instructions were clear and easy to understand. He did a good job of clearing up confusion I had about materials/concepts that were discussed in lecture by my professor. I appreciated the welcoming environment Zerin provides in both his classroom and office hours, and his willingness to help me with any course related concerns I have. His notes are very clear, well-organized, and easy to understand. My academic performance in this course is largely due to his effective teaching. I also appreciated him advocating for my peers and I when it came to assignment deadlines and workload, and would express concerns about these things to the professor. One of the goated TAs frfr.
- How the Instructor is always very prepared, has foresight and looks out for the students.
- I find this course very interesting. It's a real life application of both economics and statistics, providing a greater outlook for problems that we face in society. The professor is very kind and sweet and genuinely cares for his students.
- I really liked the clear and concise teaching that the instructor provided. I also liked his willingness to answer questions and that he provided lab notes via email request.
- I really like the way he taught us. I think that's how a lab should be. He would just work on problems during that time and I think that's exactly what we needed. Our professor wouldn't show us how to actually do examples so this was very nice that he would.
- It taught me more than the lecture did
- TA was helpful and i could understand what he did, the processes and the reasons why, unlike in class (idk why)
- The instructor was very clear in instruction and walked us through step-by-step for each problem that would later appear on the homework
- Very helpful and always responded quickly
- Zerin is incredibly effective and clear as an instructor. He is always prepared for lab sections and office hours. If a student does not understand a concept that he just covered, he will break it down further in a way that makes the concept easily understandable. His explanations are concise but contain enough context for me to understand him. Most of my learning for this course is done during lab sections and office hours with Zerin.

3.2) What could the instructor do to improve the course, if anything?

- I cant think of any notes to give my instructor, very well ran lab section.
- It has been shown many times that the professor is not organized, comes in late, and mixes up concepts from our class with other classes.
- I think this class was exactly how it should've been.
- Making notes and any in-class materials available! These are very important resources for students and not everyone can learn the same way. Econometrics is already a very hard subject and it's very stressful to not have more dependable and accessible notes to refer to when learning for HWs and Midterms. I can assure at least 10% growth in how students understand the material when they have access to these notes more immediately.
- My only recommendation is to have extended office hours; Zerin's teaching is very effective. However, I understand this may not be feasible due to the structure of the course, and varying availability.
- N/a
- N/A
- No notes!
- not plan exam prep on the same day as other econ classes

3.3) Other comments or suggestions.

- N/A (2 Counts)
- n/a
- none

- Thank you for helping me not crash out about this course! I appreciate it fr.
- The midterms do not correlate with the material that we went over in class. Not sufficient time to study for exams. Class is very behind.
Currently hold a grade A in the class, wish we had more time with clearer instruction. The professor knows what he's talking about, he is very knowledgeable in this field - he just cannot bring it down to our level. The teacher assistants are the ones that are carrying most of this work.
- wish i attended more

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- Attempted to be inclusive when necessary, and Punctual.
- being in an environment that allows me to interact with others from the same course
- Depth of homework assignments
- I really enjoyed having zerin as a lab instructor because his explanations were very clear, and he would provide many examples of the quality of work they were looking for in the assignments. Zerín was really approachable and always willing to answer question so I will be recommending him as a lab instructor for future Econ 010 students.
- TA Zerín is a great TA. I liked how he was always available outside class and always gave really good feedback. During Labs he explained the homework with much detail and always answered questions. I really enjoyed having him as my TA.
- TA Zerín is the Greatest TA. His office hours are super helpful, he really cares about his students and isn't afraid to criticize teachers on what he believes is right. He asks his students what he thinks of the course and really wants to see his students succeed.
- The instructor knew the material well, and helped us make sure we understood what to do.
- The instructor teaches the course in a way that allows students to more thoroughly understand previous lectures and how to apply the information they have learned to their assignments, projects, and assessments.
- Well organized, well prepared for class.
- What was the best was that he was very clear and probably the best teacher I ever had.
- Zerín is a great ta and shows great character and friendly personality to help students like me want to succeed if I couldn't make it to class on a day I could email him and he would be understanding and supportive and made me feel better about having to miss a class when I didn't want too

3.2) What could the instructor do to improve the course, if anything?

- Does have an accent but it doesn't bother me but if it bothers someone else then that's their fault.
- Everything was good!
- Help students integrate into study groups
- I don't think anything need to be changed.
- N/A
- n/a
- Not have so much weight for in class participation
- Nothing because he was very great.
- please pay more attention to other students in class; I remember in last weeks lab my group and I waited 15 minutes with my hand up (we timed it) before Zerín left one particular person. Ie, he spent 15 mins helping one person only.
- To leave more time for questions after class.

3.3) Other comments or suggestions.

- Can't wait for you to TA me in Econ 110
- N/A
- n/a (2 Counts)

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- I liked how the instructor will always willing to answer a question and help out us whenever we were lost in something.
- I liked that the instructions and explanations for the concepts that we learned are concise and clear. I also like that the instructor is always willing to help, virtually or in person. I have learned a great deal of information within this course because of their help.
- I liked that the TA was very knowledgable about the subject and was able to answer most of my questions and confusion.
- Nice
- Since this was lab for the course, I liked how even if we didn't understand the comprehension of the stata Zerin was able to go into the missing detail or find out what was the problem.
- The instructor went through every question.
- They were nice

3.2) What could the instructor do to improve the course, if anything?

- Explain it better
- He could have written examples more clearly.
- I think making an effort to upload the notes into one note, rather than the white board would be nice. In the computer lab, if you sit in the back, you cannot see the white board very well. In addition, I wanted to look back on notes taken but was not able to unless I took a picture of the white board

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- helpful
- I liked his examples, and effort to get the class to contribute.
- the content of the class
- The explanations are clear and concise. They allow plenty of time for questions, and when asked questions, they answer in a way that's easy to understand. They make themselves available outside of class times and respond to emails quickly. Materials are easy to find and they do their best to help everyone.
- The TA is very nice and the class notes were helpful!
- Zerin is a wonderful TA, probably one of the best I've had. He's very helpful during his discussions and I rarely see anyone miss it. He goes over every problem with great clarity and he answers any questions I might have very well. His notes that he posts after discussions are my go-to if I encounter a problem I'm stuck on in the homework because chances are he went over a very similar problem in the discussion. I think he's a great TA and if I could have another discussion with him, I would.

3.2) What could the instructor do to improve the course, if anything?

- be more clear and concise with their notes, come to class prepared with notes and examples to ensure the class understands the material
- N/A.
- None.
- no recommendations
- nothing :)
- There's nothing to improve, everything is perfectly great!

3.3) Other comments or suggestions.

- n/a
- N/A.
- None.

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- I appreciate the instructor's enthusiasm for the course, his encouragement of student participation, and his organized methods of teaching and distributing the course material so that students can learn and study both in class and individually.
- I liked how concise and straightforward the class was, very easy to understand and if I needed clarification I could always ask.
- I liked that even though time was short, they would explain everything perfectly and ask if we had any questions. They would slow down as well if needed.
- The instructor was clear, and expectations were clear. The instructor was available for questions whenever we needed.
- The preparation and lectures are super easy to understand. I like this course because it review the material the professor has taught for better understanding.

3.2) What could the instructor do to improve the course, if anything?

- I have no suggestions for improvement at this time.
- N/A
- N/A.
- They did well.

3.3) Other comments or suggestions.

- Have a good summer.

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- As it pertains to the lab section specifically, I like learning STATA the most and the review going over sample midterms was very helpful. I believed the instructor was very clear and explained everything well.
- Discussion sections helped me get a better understanding of most of the material. Going through the work and seeing it worked out for us allowed me to translate that onto our exams. Also very helpful in office hours and available to meet outside of those times.
- I enjoyed using Stata.
- OMG if it wasn't for Zerin I couldn't confidently say I would've passed the class. He is a great person and explains things so perfectly I wish I could replace him for the professor. I always knew if I had any troubles or questions TA Zerin can come in and save the day. Truly the BEST TA I've ever had and this is my third year at UC Merced.
- The instructor was enthusiastic about the subject. He was very nice to us students and answered questions even after labs. It was very helpful that he replied to emails very quickly. His teaching was very effective and easy to understand as well.
- What I loved the most about the instructor for Econometrics was that he was always very patient. I had a hard time understanding several concepts. Zerin Dong would always try his best to explain the concepts in different forms to help ensure that I understood.
- Zerin knew his stuff and knew how to teach it but often went very fast and some of the steps he would teach during lab would not be the same as what the professor taught during lecture. Therefore, causing confusion.

3.2) What could the instructor do to improve the course, if anything?

- Everything was great.
- N/A
- NOPE
- Teach slower and give clearer steps and instructions for lab assignments.
- When working with STATA, especially near the beginning of the semester it would have been useful to have the worksheets include the introductory commands that are useful especially for those who haven't used STATA before. I mentioned this in the course evaluation as well but the worksheets that had both individual and group work I believe would have been better as just focusing on group work, as there was not much group time given for the project.

3.3) Other comments or suggestions.

- N/A (2 Counts)
- Thank you for your patience throughout this semester! You made a statistics class, which I was dreading, bearable and interesting!

Comments Report

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- Both TAs for this course were amazing
- Explanations and instruction were directly connected to the assignments we had in class. Zerin was very helpful in answering questions during office hours and email as well.
- I liked how understanding and attentive our TA was, they were very welcoming and provided us any help we needed.
- I liked the lab discussions for this course. This is the only time I felt like I could actually understand the material and what I was supposed to do
- I loved learning about the simple linear regression model and how we can come up with different economics topics and find different independent variables and see how they affect the dependent variable.
- NA
- none
- The way the material was presented made it easy to understand and was very detailed. The notes were easy to follow as well.
- You were great and a really big help. I truly appreciate how available and how helpful you were to us the students.

3.2) What could the instructor do to improve the course, if anything?

- N/A (3 Counts)
- NA
- none
- Nothing, Mr. Dong was so helpful and really cares about his students and was great help to me when i had a question on homework or regarding an exam.
- The wording that was used for the home works and sample midterms vs the actual midterms did not match up whatsoever. It made taking the exams extremely frustrating and although I could easily get through the sample midterms it was impossible to understand what I was supposed to be figuring out on the midterm.

3.3) Other comments or suggestions.

- Keep doing what you're doing!!
- N/A (2 Counts)
- NA
- none

3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- As always, Zerin did an amazing job at explaining the course material to my peers and I. His instructions were clear and easy to understand. He did a good job of clearing up confusion I had about materials/concepts that were discussed in lecture by my professor. I appreciated the welcoming environment Zerin provides in both his classroom and office hours, and his willingness to help me with any course related concerns I have. His notes are very clear, well-organized, and easy to understand. My academic performance in this course is largely due to his effective teaching. I also appreciated him advocating for my peers and I when it came to assignment deadlines and workload, and would express concerns about these things to the professor. One of the goated TAs frfr.
- How the Instructor is always very prepared, has foresight and looks out for the students.
- I find this course very interesting. It's a real life application of both economics and statistics, providing a greater outlook for problems that we face in society. The professor is very kind and sweet and genuinely cares for his students.
- I really liked the clear and concise teaching that the instructor provided. I also liked his willingness to answer questions and that he provided lab notes via email request.
- I really like the way he taught us. I think that's how a lab should be. He would just work on problems during that time and I think that's exactly what we needed. Our professor wouldn't show us how to actually do examples so this was very nice that he would.
- It taught me more than the lecture did
- TA was helpful and i could understand what he did, the processes and the reasons why, unlike in class (idk why)
- The instructor was very clear in instruction and walked us through step-by-step for each problem that would later appear on the homework
- Very helpful and always responded quickly
- Zerin is incredibly effective and clear as an instructor. He is always prepared for lab sections and office hours. If a student does not understand a concept that he just covered, he will break it down further in a way that makes the concept easily understandable. His explanations are concise but contain enough context for me to understand him. Most of my learning for this course is done during lab sections and office hours with Zerin.

3.2) What could the instructor do to improve the course, if anything?

- I cant think of any notes to give my instructor, very well ran lab section.
- It has been shown many times that the professor is not organized, comes in late, and mixes up concepts from our class with other classes.
- I think this class was exactly how it should've been.
- Making notes and any in-class materials available! These are very important resources for students and not everyone can learn the same way. Econometrics is already a very hard subject and it's very stressful to not have more dependable and accessible notes to refer to when learning for HWs and Midterms. I can assure at least 10% growth in how students understand the material when they have access to these notes more immediately.
- My only recommendation is to have extended office hours; Zerin's teaching is very effective. However, I understand this may not be feasible due to the structure of the course, and varying availability.
- N/a
- N/A
- No notes!
- not plan exam prep on the same day as other econ classes

3.3) Other comments or suggestions.

- N/A (2 Counts)
- n/a
- none

- Thank you for helping me not crash out about this course! I appreciate it fr.
- The midterms do not correlate with the material that we went over in class. Not sufficient time to study for exams. Class is very behind.
Currently hold a grade A in the class, wish we had more time with clearer instruction. The professor knows what he's talking about, he is very knowledgeable in this field - he just cannot bring it down to our level. The teacher assistants are the ones that are carrying most of this work.
- wish i attended more
